Here we have an amazing, beautiful and stunning Jackson SL2Q MAH. The guitar is in pristine condition; untouched, unplayed. It has a pro-setup, including fret dressing, crowning and levelling - it plays like a dream with insanely low action with no buzz or chokes. This glorious guitar comes with original ALAN keys and in a used Fender gig bag. There are amazing reviews across the web and excellent demos on YouTube. This beauty is quite rightly a vamp killer machine!! All in all, this is an absolute bargain for an absolutely divine guitar!!!! It is very light, in balance, with a very powerful pickup and range of sounds. The electronic has been amended similar to Andy Wood's guitars so the tone pots also act as a push-pull. When you change the pickups from series to parallel by pulling the tone knob, you can play sweet and gorgeous sounding country, funk and R&B. The guitar excels when you play heavy metal, rock, shred, etc. It is an absolute killer that almost does the playing for you! The neck is dream-like, plays like butter and very fast. Please look at the demos and read the glorifying reviews online. If you buy the guitar and organise your own courier, we will pack bombproof and provide you with the measurements and weight. We will take videos before and during packaging so you are totally safe!

**Manufacturer's Blurb:** Unlock your full potential as a player with the innovative Jackson Pro Soloist®; SL2Q MAH, the final word in high-tech guitar design. A high performance evolution of the electric guitar, this ergonomic instrument opens up new horizons of playability, resetting the bar of what's possible in guitar design. Premium features include a mahogany body with quilt maple top and one-piece through-body maple neck with scarf joint and graphite reinforcement rods to provide stiffness and high stability, guarding against temperature- and humidity-induced bending and warping. The SL2's 12"-16" compound radius ebony fingerboard with 24 jumbo frets is designed for highly technical lightspeed playing - more curved by the nut for comfortable chording, it flattens out as you move up the speedy neck (with hand-rubbed oil back finish) for increasingly fast playing speed and wide bends without fretting out. Chosen specifically for their complementary sound, a pair of modern Seymour Duncan®; Distortion humbucking pickups (TB-6 bridge/SH-6N neck) drives this guitar's voice, combining for highly balanced, flexible tone, with plenty of high output for pristine cleans and snarling distortion. Volume and tone controls shape the pickups' output, which can be further refined with the three-position toggle switch for the
